

# alcatel SNAPBAK™ Power

## Power SNAPBAK™ Overview

The Alcatel Power **SNAPBAK** is the perfect companion for your **PULSEMIX** to keep you productive and entertained all day long.

Simply snap on the slim and easy-to-connect battery back cover, instantly increase your phone's battery life with a push of a button!

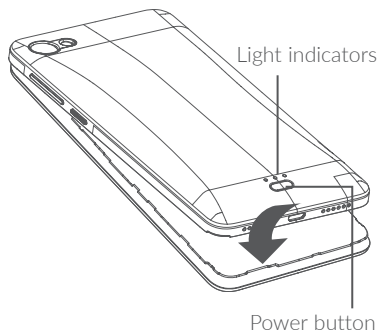

## QUICK START GUIDE

Compatible with the Alcatel **PULSEMIX** Smartphone and Alcatel A50™ series

English - CJB29Q0ALAAA

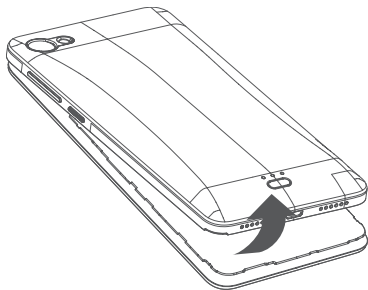

## Attaching

- Remove back cover from your phone.
- Using the camera for alignment, attach the Power **SNAPBAK** and snap it into place.
- Your phone will automatically detect the Power **SNAPBAK** and a Power icon  will appear in the notification bar.
- Press the power button on the back of the **SNAPBAK** to start charging your phone.

## Removing

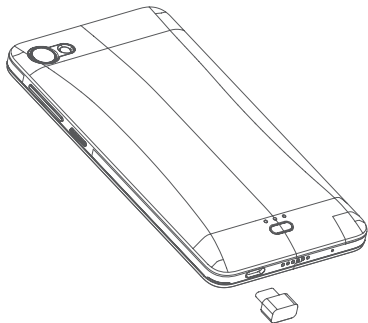

- Place your finger in the notch at the left bottom of the phone.
- Slowly pull the cover away from your phone.

## Charging Your Phone with Your Power **SNAPBAK**<sup>™</sup>

Your Power **SNAPBAK** can charge your phone when you need an extra boost! To charge your phone, press the power button on the back of the **SNAPBAK**. If you do not press the button, the **SNAPBAK** will not charge your phone.

When your phone battery is fully charged, press the power button again to stop charging.

**Note:** When your phone battery is completely depleted and your Power **SNAPBAK** is charged to 100%, it will take approximately 3.8 hours to charge your phone to 70%

## Power **SNAPBAK**<sup>™</sup> Charge Status

Above the power button on the back of your Power **SNAPBAK**, there are 3 small round status lights.

A key to understand that **SNAPBAK** status lights is listed below:

-  **SNAPBAK** charged to 0%-33% of capacity
-  **SNAPBAK** charged to 33%-66% of capacity
-  **SNAPBAK** charged to 66%-100% of capacity
-  Fully charged

When the Power **SNAPBAK** battery is low, all three lights will blink together, three times a second, to indicate that it needs charging.

## Charging Your Power **SNAPBAK™**

With the Power **SNAPBAK** attached, charge the phone as you normally would with the charging cable. Your phone and **SNAPBAK** will charge at the same time.

When the **SNAPBAK** is charging, the status lights will blink once every second.

If your phone is fully charged and the battery in the Power **SNAPBAK** is empty, it will take approximately 4.3 hours to fully charge your **SNAPBAK**.

**Note:** The Power **SNAPBAK** cannot be charged independently. It must be attached to your phone to charge.

## Troubleshooting

If your cover is not working, try the following:

- Restart your device.
- Remove and re-attach Power **SNAPBAK**.
- Make sure the connectors on the cover are clean before attaching.
- Contact customer support if you continue to experience issues.
